Engineering your digital future

Integrated solutions for modern organizations

The challenge

Are “operational challenges” costing you growth?

Scattered data

Critical data is trapped in isolated departments, which slows collaboration and leads to uninformed decisions.

→ **Disconnected teams, lost insight**

Manual processes

Repetitive, error-prone tasks drain your team’s time and energy — time that should be invested in growth.

→ **Lost hours and human error**

Hidden risks

Security gaps, compliance failures and untracked documents create invisible threats to your organization.

→ **Risk exposure and compliance liability**

Who we are

We are **Hexture**. We build digital **ecosystems**.

Our goal is to remove operational bottlenecks by building smart, integrated systems that help organizations make sense of their **data**.

Efficiency-first design

Every system we build is engineered to eliminate waste and maximize output at every level.

Breaking down silos

We connect your separate systems so information flows freely and securely across your organization.

Aligned with Vision 2030

Our solutions are built to support the digital transformation and national ambitions of the Kingdom of Saudi Arabia.

Our core engine

AI at the heart of everything we do

Unlike others, our solutions aren't just digital — they're **intelligent**. Our software core is designed to learn, automate and deliver predictive insight.

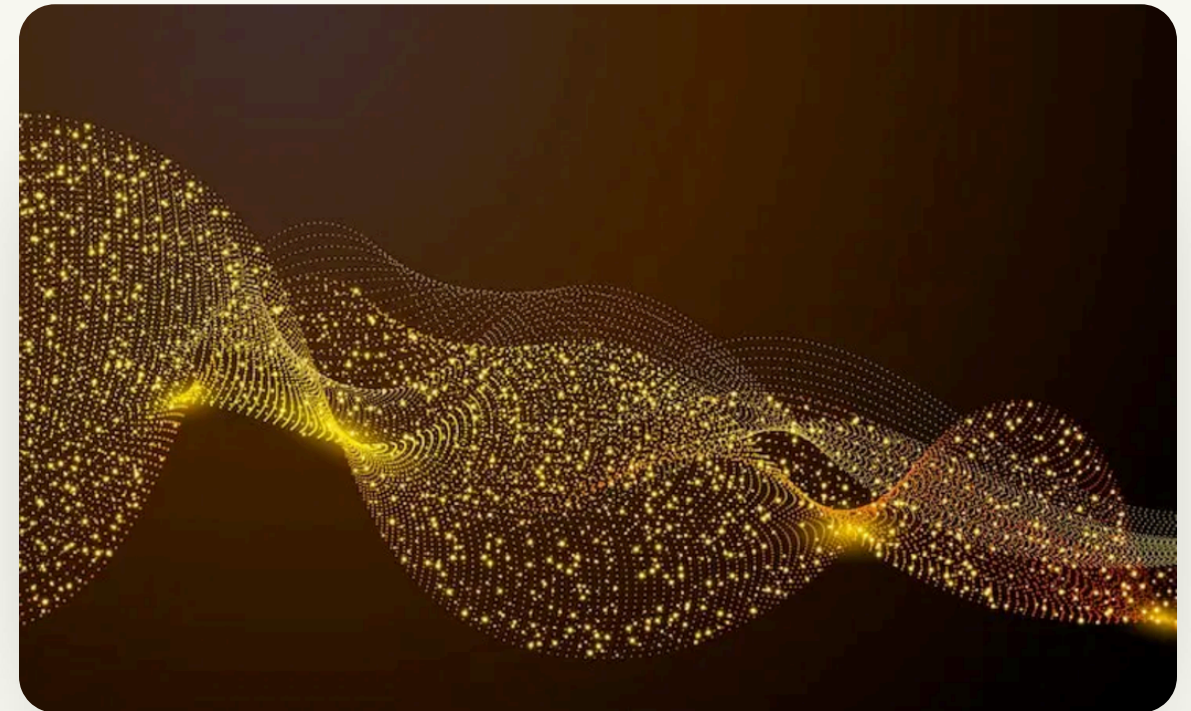

Continuous learning

Adapts to your data's unique patterns for consistently accurate results.

Smart automation

Handles routine decisions instantly to speed up your workflows.

The ecosystem

One partner. **One ecosystem.** Total control.

Document Management System (DMS)

Centralize, organize and intelligently search all your files with AI-powered precision.

Administrative Correspondence System

Manage official incoming and outgoing correspondence with complete, reliable tracking.

Meeting Management System

Streamline agendas, minutes and formal voting with complete digital governance.

Warehouse & Inventory Management

Real-time visibility and control over your physical assets and stock levels.

Visitor & Access Management

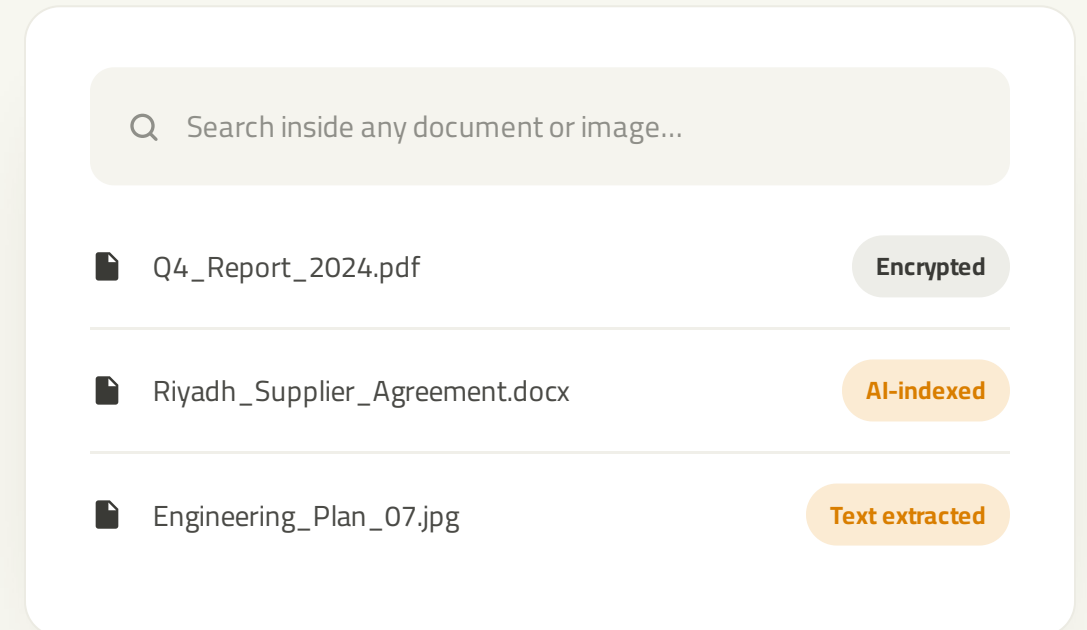

Smart digital reception and secure, efficient control of facility access.

Deep dive: Document Management System

Let's start with your most valuable asset: **your documents.**

Our flagship system turns document chaos into a **centralized, intelligent and highly secure** asset that works for you around the clock.

- ✓ AI- and OCR-powered search
- ✓ Encryption to advanced security standards
- ✓ Workflows and approval automation

DMS feature

Instant information extraction from **every document, accurately**

Our engine reads the text **inside all your files** — including images and scans — using advanced OCR technology.

"Compliance clause in the Q4 report"

✓ Found on page 14, section 3.2

90%

Faster document retrieval

From 45 minutes to just 4.5 minutes, thanks to the smart search engine.

Security

Advanced protection for your data, to **global** security standards

Your documents hold your most sensitive information. Hexture protects them to the highest global security standards.

Full encryption

Data is encrypted at rest and in transit.

Granular permissions

Role-based access ensures only the right people see the data.

Live audit log

- 👁 Ahmed Al-Rashed viewed Contract_2024 — 09:14 AM
- ✓ Sara Al-Otaibi approved the budget — 09:02 AM
- 🛡 3 new files encrypted — 08:55 AM

Deep dive

Secure **administrative** correspondence

Secure correspondence

Internal correspondence with end-to-end encryption for the highest classification levels.

Official circulars

Distribute and track official circulars smoothly across your entire organization.

Archiving & full search

Instantly find any past correspondence with AI-indexed retrieval.

Administrative correspondence

Dashboard & operational benefits

Complete audit trail

Track every message from dispatch to delivery, with timestamps.

An end to email chaos

Move official work into a structured system instead of disorganized inboxes.

Guaranteed delivery

Read receipts ensure critical updates are never lost.

Dashboard

Last update

✓ Circular No. 402 delivered — to all departments

🕒 Audit log updated — 09:45 AM

🔒 Encrypted memo sent — HR Director

Deep dive

Meetings **without the effort**

Agenda building

Build and share agendas collaboratively to ensure alignment before the meeting starts.

Live & remote voting

Run formal, transparent votes in real time, or remotely through the platform.

Automated minutes

Generate and archive meeting minutes instantly, with every decision and action item recorded.

Meetings & voting

Governance & transparency

Higher efficiency

Cut preparation and follow-up time by up to 60% through automation.

Guaranteed transparency

Every vote and decision is recorded in a tamper-proof digital log.

Simpler governance

Maintain board-level compliance with automatic record-keeping.

Active vote

Board Resolution #88

Approve	85%
Reject	15%

Deep dive

Smart **visitor** & access management

Self check-in

Fast digital registration gives your visitors a smooth, professional experience from the very first moment.

Smart log exploration

A powerful search engine that lets you filter and sort visitor records with ease.

Security protection

Smart identity verification and access-permit management for sensitive areas, fully secure.

Operational benefits

Unmatched efficiency

A more professional front desk

Leave a modern, impressive first impression on every visitor and partner.

No more paper logs

A fully digital process that cuts costs, protects the environment and prevents data loss.

Instant alerts

Real-time notifications to hosts the moment their visitor arrives, for a faster response.

Live visitor log

Deep dive

Smart **warehouses**

Real-time tracking

Know the exact location of every asset, around the clock, across multiple warehouse sites.

Smart stock alerts

Automatic alerts for low stock or expired items, so gaps never open up.

Supplier management

Manage suppliers and purchase orders from one hub, with automated workflows.

Warehouses & inventory

Visibility & procurement

Storage optimization

AI-powered layout suggestions that save space and speed up picking.

Lower costs

Prevent loss and reduce storage costs through precise inventory control.

Procurement automation

Set automatic reorder rules so critical assets never run out.

Live inventory status

Laser printers — 45 units

In stock

A4 paper — 12 boxes

Low

Our impact

How we empower **leaders** across the Kingdom

State Security Presidency

Smart warehouses for full oversight

A system that tracks every movement in real time with granular permissions, ensuring secure, controlled management of sensitive assets.

GCC Unified Military Command

A unified platform for administration and visitors

Connected systems for correspondence, documents and visitor registration that unify procedures and speed up coordination between sectors.

Prince Sultan University

Document Management System

Employee documents retrieved in seconds instead of minutes, thanks to smart classification.

SAFE Security Company (PIF)

Digital administrative approvals

Decision-making accelerated by 75% through fully digital approvals and electronic signatures.

Why Hexture

Your vision. Our technology. Shared success.

We don't just deliver software — we become a strategic partner invested in your long-term growth and digital transformation.

🚩 **Aligned with Vision 2030**

Integrated by design

Our systems (documents, correspondence, meetings and warehouses) share one unified data layer for maximum efficiency.

Local expertise

A deep understanding of the Saudi market and regulatory landscape. We speak your language — literally and strategically.

A true partnership

A dedicated support team in the Kingdom, always by your side — from implementation to growth.

Next step

Let's build your **digital future** together.

Book a strategy consultation to discuss how our integrated system can be tailored to your organization's needs and goals.
